EDUCATION

School of Engineering, Pokhara University

Bachelor in Computer Engineering

Relevant Coursework: Data Structures and Algorithms, Advanced Front-end Development, Computer Architecture, Operating Systems, Object Oriented Software Engineering, Programming Technology, Database Management Technology, Microprocessors, Information System, Theory of Computation.

EXPERIENCE

Internship

Jyaba.tech

- Built and maintained data scraping tools using **JavaScript** and **Python** for automating web data extraction.
- Worked on the Himalayan Hero project as a Front-End Developer, creating responsive user interfaces using **React.js**, **Tailwind CSS**, **HTML**, and **CSS**, and also contributed to back-end development tasks.

PROJECTS

- **HimalayanHero.com:** Developed a tracking and service platform for tourists using Django, **Tailwind CSS**, **JavaScript**, and **HTML**; features include location tracking and real-time service support.
- **Ticket Booking System:** Built a functional ticket booking interface with **JavaScript**, **HTML**, and **CSS**, and implemented back-end logic using **Django** for data processing and management.
- **College Website:** Designed and developed a modern, responsive college website using **React.js**, focusing on intuitive navigation and clean UI components.

TECHNICAL SKILLS

Language: C, C++, Python, javascript

Frontend Tools: ReactJs, Tailwind, Bootstrap

Back-end Tools: Django

Dev Tools: Git, Github, VS Code
